Technical Skills

Programming Languages: JavaScript, HTML, CSS, Python, C++, C#, SQL, R

Productivity Tools: Adobe Premiere, Adobe After Effects, Articulate Storyline, Blender, Power BI, Unity, ZBrush

Protfolio:xinyidou.fyi

Education

Simon Fraser University *Sep 2025 – Present*
Master of Digital Media

University of British Columbia
Bachelor of Science, Major in Computer Science *Sep 2019 – Apr 2025*

Relevant Courses: Computer Graphics (A), Computer Vision (A-), Software Construction (A), Relational Databases (A+), Machine Learning and Data Mining(A-), Video Game Programming (A), Computer Animation (A-)

Projects

Immersive Clinical Experience 2: AR/VR medical learning Project *Sep 2022 – Apr 2023*
Developer, Planner, Designer

- Prototyped and designed the 3D game environment with **Unity**, incorporating various 3D assets/ animations that were modeled and textured using **Blender** and **Substance 3D Painter**.
- Collaborated with **faculty members, clinicians, and medical students** to gather requirements, identify key learning outcomes, and translate clinical procedures into interactive VR learning scenarios.

GunCat: a 2D Arcade Shooting Game *Sep 2024 – Apr 2025*
Programmer, Concept Art Creator, Level Designer

- Developed a 2D arcade game from scratch using **C++** and **OpenGL**, gaining hands-on experience with **graphics programming, rendering pipelines, and shader implementation.**
- Designed and implemented interactive systems including HUD, menu navigation, and animation pipelines, strengthening understanding of UI/UX principles and user interaction in learning contexts.
- Created original concept art and 2D sprite animations, integrating visual storytelling with technical implementation to explore the role of visuals in enhancing engagement and instructional clarity.

Work Experience

Learning Technology Rover
UBC Faculty of Medicine – Digital Solution – EdTech *Sep 2022 – Apr 2023*

- Designed and prototyped Immersive Clinical Experience 2 (ICE 2), an AR/VR medical learning platform simulating clinical procedures, helping students practice decision-making in a safe virtual environment.
- Developed interactive 3D assets using Blender and Substance 3D Painter, integrating them into Unity to create realistic and instructional learning scenarios.
- Revised xAPI statements and enhanced data parsing in Entrada, improving the accuracy of learning analytics and instructional effectiveness.
- Supported instructors in course material updates and Canvas integration, bridging technical solutions with educational needs.
- Collaborated with educators and engineers on the Direct Observation project, using Qualtrics and Oracle Apex to optimize digital assessment workflows.
